

## Atlantic Chapter Annual Technical Day and General Meeting

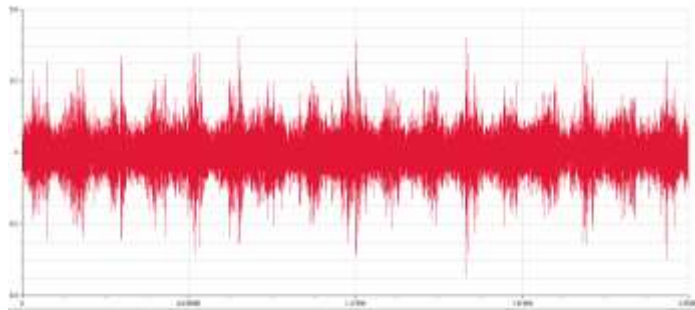

---

### Introduction

The CMVA Atlantic Chapter will be hosting its annual technical offering with a full day course on “**Time Waveform Analysis**”, as well as its Annual General Meeting (AGM) on **December 10, 2019** taking place at the **Hampton Inn and Suites 700 Mapleton Road, Moncton, New Brunswick**. The full program will run from 8:30am until 4:30pm. Please join us for a day of learning and networking.

This chapter sponsored event will be **free to all CMVA members**, and is open to **non-members with a registration fee of \$75.00 CAD**, payable in advance with PayPal, or payable at the door in cash or cheque.

### Technical Overview

An often overlooked and underutilized tool in a vibration analysts day to day is the time waveform collected with every data point. You cannot have vibration data without the time waveform! Certain faults and aspects of your machine’s health can be better identified and assessed in the time signal. The course that **instructor Grant Akitt P.Eng** has put together, is designed to have our analysts get a better understanding of this useful and essential skill.

Grant Akitt P.Eng is the owner and general manager of PDM Technologies Inc, and has over 20 years of experience in the fields of vibration analysis, monitoring, protection systems, and training. He is the current CMVA Ontario Chapter President, and also maintains a seat on your CMVA National Board of Directors.

### Annual General Meeting of Members

The chapter’s **annual general meeting** will take place at the end of the course from 3:30pm to 4:30pm. This portion of the day will include a **report from the president**, an update on the **chapter’s financials** from the treasurer, and allow the **members to vote for their chapter executive** in the annual election, and the chance to provide input on the **2020 action plan for the chapter**.
